

Knowledge Bank: Year 1 – Science – How does your garden grow?

What I should already know:

We already know that plants can grow in different places.

Key Vocabulary:

Word	Definition
roots	Roots take in water and nutrients from the soil and keep the plant in the ground.
stem	The stem holds the plant up and carries the water and nutrients from the roots to the leaves and flowers .
leaves	Leaves catch sunlight to help the plant to make its own food.
flowers	Flowers attract insects and birds.

Wild Plants

dandelion

Garden Plants

fuchsia

ivy

rose

Key Facts:

Fact

An evergreen tree has leaves all year round.
A deciduous tree loses its leaves in autumn.

A wild plant grows where it falls and does not need care. Garden plants are plants that people choose to have in their gardens.
