Knowledge Bank: Year 6 Science – Life as we know it

How has **biology** shaped life as we know it?

- fossilisation
- preserved
- paleontology
- development
- naturalist
- 34152 ↓ 12345 sequence
- inheritance
- offspring
- genes
- influential

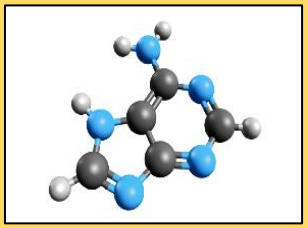

Fossil types:

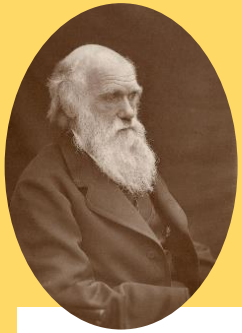

Trace
Fossil of anything made by an organism or left behind by one.

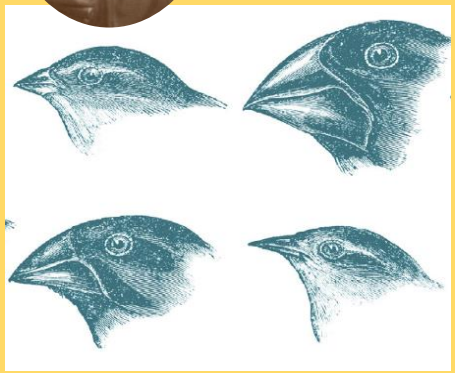

Body
Rocks that have preserved evidence of bones, teeth, and shells.

Chemical
Chemicals found in rocks and fossil fuels (petroleum, coal, and natural gas).

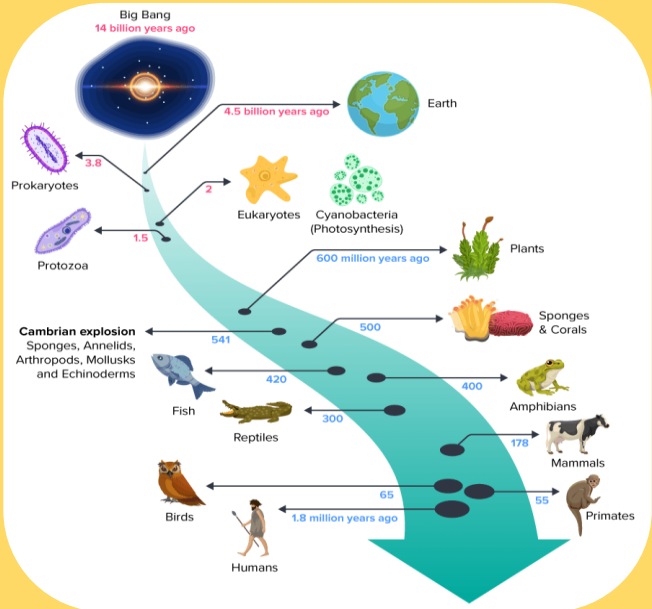

Charles Darwin (1809-1882)

Darwin's Finches

Evolution timeline:

- theory
- adaptations
- test
- compare
- adapted
- variation
- evolved
- patterns
- evolution
- neanderthal
